(54) Title: **QUAD FLAT NON-LEADED PACKAGE COMPRISING A SEMICONDUCTOR DEVICE**

(57) Abstract: A semiconductor package is proposed. The semiconductor package includes a discrete semiconductor chip on a die pad; a plurality of bond pads situated next to the chip and formed with a plurality of connecting mechanisms and an encapsulant for encapsulating the chip and the pads. In a preferred embodiment the die pad and/or the bond pads comprise means for vertically and laterally interlocking the pads to the encapsulant. The interlocking means of the bond pads and the die pad significantly enhance the bonding strength between the pads and the encapsulant for preventing delamination or cracking, so that quality and reliability of the quad flat non-leaded semiconductor package comprising a discrete can be assured.

### \* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
